**Pflegehinweis:**

Alle Messer und Paletten sind grundsätzlich spülmaschinengeeignet.

Die Reinigung in der Spülmaschine ist durch die heute zum Einsatz kommenden Reinigungsmittel jedoch wesentlich aggressiver als die Reinigung von Hand.

Speisemittelreste wie Obstsäuren, hochkonzentriertes Reinigungsmittel oder langes Verbleiben der Messer im heißen Dampf kann auf den Klingen zu Flecken bzw. im schlimmsten Fall zu Rostbildung führen.

Gleichzeitig führen starke chemische Reinigungsmittel zu einem elektrochemischen Abbau der Schneide.

Daher empfehlen wir die Reinigung sofort nach Gebrauch per Hand unter fließendem Wasser mit einem sanften Lappen und einem milden Reinigungsmittel.

Durch ein anschließend sorgfältiges trocken wischen der Messer mit einem weichen Tuch nach dem Reinigen, werden Flecken auf der Klinge vermieden. Außerdem wird die Schneide geschont und bleibt länger scharf.

**Instructions for care**

All knives and cake spatulas are in general dishwasher proof.

Cleaning by hand is recommended, thus you prevent that the blade gets in contacts with aggressive detergents.

Food remnants such as ascorbic acids, highly concentrated detergents, or prolonged exposure to hot water steam, may cause the blade to stain, or even develop rust, in the worst case.

Strong chemical cleaning agents will at the same time lead to the electrochemical deterioration of the cutting edge.

Right away after each use, we therefore recommend rinsing under running water, using a soft cloth and mild detergent.

Wiping the knife with a soft cloth after cleaning will prevent the blade from developing stains. This will conserve the cutting edge which means it will remain sharper much longer.

Dieser Handschuh bietet vollständige Keimfreiheit beim Umgang mit Lebensmitteln. Insbesondere in Bäckereien oder der Gastronomie ist dieses Produkt eine schnelle und unkomplizierte Hilfe ohne ständig die Hände reinigen zu müssen. Durch die Benutzung wird eine direkte Berührung mit dem Lebensmittel verhindert. Die Anwendung beim Ein- und Ausschlüpfen ist durch das Verbindungselement mit einem automatischen Auf- und Abwickeln einer Zugschnur einfach und praktisch!

These gloves offer complete sterility while food is being handled. Especially in bakeries or in the food service trade they are a fast and easygoing help. It is not necessary to permanently wash the hands. By using these gloves a direct food contact is being prevented. The application of removing and inserting the hands is made simple and practical thru the use of a connecting element which automatically reels – and unreels the pull cord connected to the gloves.

**Spezielle Rezepturen und mehrschichtige Folienextrusionen ermöglichen die Produktion bei stark reduzierter Materialstärke, bei gleichzeitig hoher Festigkeit und sogar verbesserten Eigenschaften wie Öl- und Temperaturbeständigkeit.**
**Wir tragen dazu bei, die lebenslangen Umweltauswirkungen zu reduzieren, indem weniger Ressourcen verbraucht werden und weniger CO2-Treibhausgasemissionen bei Produktion, Versand, Recycling / Entsorgung entstehen.**

Das Gewicht wurde auf der Grundlage von Vollmilch-Schokolade bestimmt und kann je nach Schokoladensorte, der Füllung sowie der Gießtechnik, Abweichungen verzeichnen.

The weight is based on a moulding with solid milk chocolate and may depend on your chocolate, filling and way of moulding.

Il peso viene determinato in base a cioccolato al latte e può subire variazioni secondo il tipo di cioccolato impiegato, il ripieno e la tecnica di fusione.

El peso queda determinado a base de chocolate con leche entera y puede ser distinto según el tipo de chocolate, relleno y técnica de moldeo.

## Gebrauchshinweise

Wir empfehlen generell, alle Produkte, sofern nicht anders beschrieben, nicht mit aggressiven Reinigungsmittel zu reinigen. Um die Lebensdauer zu verlängern und die Qualität des Produktes zu erhalten, ist das Reinigen mit herkömmlichen Spülmitteln empfohlen. Der Einsatz von Industriespülmaschinen unter Verwendung teils aggressiven Reinigern kann Kunststoffe porös machen, Beschichtungen angreifen und das Produkt verfärben.

## Instructions for use

We generally recommend not to clean all products with aggressive cleaning agents, unless otherwise described. In order to extend the service life and maintain the quality of the product, cleaning with conventional detergents is recommended. The use of industrial dishwashers with partly aggressive cleaners can make plastics porous, attack coatings and discolour the product.
